

PRODUCT INFORMATION

REMOTE CONTROL 2.0

*The **Remote Control 2.0** will allow users to operate Oticon hearing instruments discreetly without any other devices needed.*

The Remote Control is a discreet and elegant solution for all users, and a complementary accessory for users of hearing instruments without buttons.

Easy to operate with full discretion

The Remote Control offers an intuitive, straightforward and discreet way to operate the hearing instruments.

With the Remote Control, the hearing instrument user can perform the most common everyday adjustments without drawing attention to the hearing instrument.

Users can adjust volume up/down and cycle through the hearing instrument programs.

Full discretion is offered, since the Remote Control can operate the hearing instruments from a distance of up to 1 metre and since a direct line of sight between the Remote Control and the hearing instruments is not required.

Easy to operate

The Remote Control buttons are clearly visible and easy to operate.

Every time a button is pressed, a discreet clicking sound is heard and felt by the user and a visual indication on the Remote Control confirms the action.

PRODUCT FEATURES

Technical data Remote Control 2.0

Weight (incl. batteries)	32.7 g
Battery Type	2 x AAAA
Battery Life Time at Normal Use	1 year
Typical Transmission Range	1 metre
Indicator	Green LED blinking when Remote Control is operated or battery is low
Operating temperature	10 - 45 °C
Operating humidity	Relative humidity < 85%
Storage temperature	-20 - 70 °C
